About the mobile units

+7 (3452) 38 55 22
petroleum-energy.ru

2-3 months

Design and Commissioning
period

5-10 times

The cost of work is cheaper in comparison
with the capital construction of the oil
treatment plant

GOST

Complexes allow to prepare oil according to
GOST R 51858-2002, as well as other
customer requirements

Petroleum Energy LLC

Oilfield Services Company

Preparation of water with
injection into the reservoir
or disposal on GFUs

Use of separated gas
for the needs of the
complex

Full autonomy of the
installation and
rotational residential
complex

Key
preparation
processes

Removal of
mechanical
impurities

Turnkey solution

You get the finished product on your terms and for your task.

We do not immerse you in the process if you do not need it.

Risk minimization

In case of an error in the assessment of oil reserves, the use of mobile units will allow you to avoid the risk of losing time and money.

- ▶ Staff
- ▶ Equipment
- ▶ Licenses
- ▶ Infrastructure

No downtime

Quick assembly and disassembly

Power control, easy upgrade

Registration of the object under our name

Before starting work, we register a hazardous production facility in Rostekhnadzor with obtaining a license for our company.

----- >
Interaction with regulatory authorities is our responsibility

Possibility of further purchase of equipment.

Only time-tested specialists

No checks
Without equipment on balance
No additional tax burden
Without responsibility

Combining capital construction projects with mobile units

Creation of Technological Installation passport

Petroleum Energy projects

POTENTIAL OPPORTUNITIES

Our Team

VESHKURTSEV
ANTON

Director

12 years of experience in the oil and gas industry.

Has gone from assistant driller to deputy director of the oil field of the Uvat group of fields in RN-Uvatneftegaz LLC (subsidiary of Rosneft).

YUNUSOV
ALVERT

Chief engineer

38 years of experience in the oil and gas industry.

Has gone from a machinist to the director of the Department for the Preparation and Transfer of Oil and Gas at various subsidiaries of the PJSC Rosneft (LLC RN-Yuganskneftegaz, JSC Saratovneftegaz, JSC Tyumenneftegaz, JSC Novosibirskneftegaz and LLC RN-Uvatneftegas).

KARLOV
EVGENY

Head of production

12 years of experience in the oil and gas industry.

Has gone from the fuel system operator to the main specialist of the production (LLC RN-Yuganskneftegaz, LLC RN-Uvatneftegas, JSC Tyumenneftegaz).

BAGLAEV
DENNIS

Chief specialist of production

11 years of experience in the oil and gas industry.

Has gone from the fuel system operator to oil preparation master in JSC Var'yeganneftegaz (subsidiary of Rosneft). For more than 5 years - foreman of JSC "HMS Neftemash" on manufacturing products for the oil and gas sector as part of large-scale projects at the Messoyakhskoye field, Novoportovskoye field and others.

ZHIRYAKOV
VLADIMIR

Chief specialist of production

12 years of experience in the oil and gas industry.

Has gone from an engineer to the head of the group of field gathering and gas preparation at the design institute of PJSC Giprotymenneftegaz. For more than 4 years - the leading specialist of the department for the use of gas in LLC PH-Uvatneftegaz (subsidiary of Rosneft).

BUDIEV VLADIMIR

Master on the preparation and stabilization of oil

38 years of experience in the oil and gas industry.

Has gone from the operator of dehydrating and desalting plant to the master technologist for the preparation and stabilization in PJSC NK Rosneft (JSC Tyumenneftegaz, LLC TNK-Uvat, LLC RN-Uvatneftegaz).

HAIRTDINOV
RAIL

Master on the preparation and stabilization of oil

33 years of experience in the oil and gas industry.

Has gone from assistant driller to master technologist for the preparation and stabilization of oil in various oil and service companies (LLC NGDU Oktyabrskneft, LLC KATKoneft, JSC Overhaul of wells, LLC Eco-Technology Plus).
